

# RM6000-3 EXTERNAL RAIN MAINS SYSTEM

## EU SERIES

RM6000-3 Rainpro® is the RM4000-3 RainPro® “Easy Install” unit with the added advantage of a pump cover. No cables, no float, no solenoid, no electronic controls. Kit comes complete with cover and flexible hoses. The RM6000-3 restricts the flow of mains supply while rain water is being pumped to help water. This system is only suited to flooded suction and is best suited for supplying laundry and toilets only. For suction lift and underground tanks, use submersible pump option RM5000. For whole house supply (more than 1 bathroom) use the RM6000-5. Pump covers are available in a variety of colours to match most standard tank colours.

### APPLICATIONS

- Domestic toilet & laundry
- Small house / cabin / granny flat (1 bathroom)
