

# RM6000-2

## RAIN TO MAINS SYSTEM - FLOATLESS in PUMP COVER

RM6000-2 Rainpro® is the RM4000-2 RainPro® "Easy Install" Unit with the added advantage of a pump cover. No cables, no float, no solenoid, no electronic controls. Kit comes complete with cover and flexible hoses. The RM6000-2 restricts the flow of mains supply while rain water is in the tank to help conserve our precious resource. This system is only suited to flooded suction and is best suited for supplying laundry and toilets only. For suction lift and underground tanks, use submersible pump option RM5000-2. For whole house supply use the RM3000-2. Pump covers available in a variety of colours to match most standard tank colours.
